## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/27/2009 has been entered.

### ***Election/Restrictions***

Claims 1-11 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 12-15, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, Claims 12-15 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 11/16/2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the

claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 2, 7, and 8, withdrawn as directed to non-elected species are hereby rejoined and fully examined for patentability, as the novelty of the invention is seen in having at least two “constitutionally” different monophosphorus ligands, and not in the specific ligands used.

***Allowable Subject Matter***

Claims 1-15 are allowed.

The following is an examiner’s statement of reasons for allowance: None of the prior art fairly teach or suggest the use of at least two “constitutionally” different monophosphorus ligands. While the prior art does teach the use of ligands that read on the instant invention, and the prior art does teach the use of two different monophosphorus ligands, these two different ligands are either enantiomers or diastereomers, and as such they are not “constitutionally” different, as required by the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
